

Patternpro™

ULTRA STABLE
PATTERNING FABRIC

Protecting your investment

Patternpro™ is clear HDPE woven scrim and coated both sides. Ideal for marine canvas patterning, and popular with fabricators because of its stability and good lay-flat properties.

Patternpro™

ULTRA STABLE PATTERNING FABRIC

Patternpro® has been a favorite material for Australian fabricators for a number of years. Popular as a pattern material for marine and awning projects and can be used for short-term stationary tarps and covers.

Product profile

Material – High Density Polyethylene, Virgin grade

Weight – 4.87 oz per sq yard/165gsm +/-5%

Scrim – 10 x 10 per sq inch

Width – 78.7 inches/2 meters

Roll Length – 55 yards/50 meters (rolled on paper cores)

Color – Translucent (Clear)

Temperature Resistance – ~-22 deg F to +158 deg F/-30 deg C to +70 deg

Technical specification

Light transmittance	70%		
Tensile strength	Warp	13KN/m	ASTM D 5035
	Weft	13KN/m	ASTM D 5035
Tear strength	Warp	130 N	ASTM D 751
	Weft	130 N	ASTM D 751
Elongation	Warp	20%	ASTM D 5035
	Weft	20%	ASTM D 5035

Product Disclaimers:

This product is designed for patterning or for short-term/temporary covers.
This product is not suitable for applications where excessive flexing or 'wind flap' is present.
The product specifications represent the results sourced from third party testing authorities, and tolerances may vary by as much as +/- 10%.
The Manufacturer reserves the right to alter or modify product specifications and colors without notice, and assumes no obligation or liability for the suitability and use of its products other than those applications intended by the Manufacturer.
