# The Plus side is coming in 2021

Heat set for better 'layflat', less curling and less shrinkage

NEW

**NEW** 12 year limited warranty

Comtex+ Polytex+

NEW colors

Improved pigments

NEW Comtex+ & Polytex+

In the most transformative change in the 12-year history of Polyfab USA, we are pleased to announce we have made several improvements heading into 2021. These changes to the product line will reinforce our reputation as "a world leading manufacturer and wholesaler of premium products"!

We have developed new versions of Polytex and Comtex, which we will be calling **Polytex+** and **Comtex+**. The new versions of these products, coming in 2021, will be stentered (heat-set) and retain the same FR properties of Polytex and Comtex.

#### Heat set

For the fabricator, heatsetting gives the knitted fabric a slightly softer hand (which the sewing machine operators like), and the fabric has better 'lay-flat'—less curling on the edges and much easier to work with for fabricators. Also, since the heating process takes out some of the shrinkage in the fabric, the stentered fabric will shrink less and have improved dimensional stability (less settling in therefore less re-tensioning).

# New Improved pigments

We are pleased to announce that the following colors of Polytex and Comtex, starting now, will be made with new and improved pigments:

- Bronze
- Golden Yellow
- Grape
- Lime
- Red
- Rust

The new version of these colors is slightly more intense than the original color shades. We will get samples to our distributors by early 2021.

### New 12 year limited warranty

As a confirmation of our confidence in these changes, we will be increasing our warranty period for the new Polytex+ and Comtex+ from 10 years to 12 years!

## **New colors**

We will also be adding some new colors. Our proposed new colors are based on Colorbond® Steel Colours of Australia, which are used for things like roofing, fascias, garage doors, fences, sheds, patios & pergolas. These classic building colors will go well for shade structures against all types of buildings here in the USA:

#### **Polytex+**

- Paperbark
- Woodland Grey
- Monument
- Manor Red

#### Comtex+

- Paperbark
- Monument
- Smoke
