

# Patternpro™

ULTRA STABLE  
PATTERNING FABRIC

## *When accuracy is essential*

Patternpro™ is clear HDPE woven scrim and coated both sides. Ideal for marine canvas and awning patterning, and popular with fabricators because of its stability and good lay-flat properties. The HDPE will resist wind and water on the job, and the pattern can be saved in your product library for recovers!

# Patternpro™ ULTRA STABLE PATTERNING FABRIC

**Patternpro®** has been a favorite material for Australian fabricators for a number of years. Popular as a pattern material for marine and awning projects, **Patternpro®** has great “layflat” and is coated on both sides.

**And now it's also available in NEW extra-wide width – 157 inches / 4 meters!  
Full width – not welded or seamed!**

## Product profile

**Material** – High Density Polyethylene, Virgin grade

**Weight** – 4.87 oz per sq yard/165gsm +/-5%

**Scrim** – 10 x 10 per sq inch

**Width** – 78.7 inches/2 meters and NEW 157 inches/4 meters

**Roll Length** – 55 yards/50 meters (rolled on paper cores).  
(4 meter rolls are center-folded)

**Color** – Translucent (Clear)

**Temperature Resistance** – ~-22 deg F to +158 deg F/-30 deg C to +70 deg

## Technical specification

<b>Light transmittance</b>	70%		
<b>Tensile strength</b>	Warp	13KN/m	ASTM D 5035
	Weft	13KN/m	ASTM D 5035
<b>Tear strength</b>	Warp	130 N	ASTM D 751
	Weft	130 N	ASTM D 751
<b>Elongation</b>	Warp	20%	ASTM D 5035
	Weft	20%	ASTM D 5035

### Product Disclaimers:

This product is designed for patterning only. This product is not suitable for applications where excessive flexing or ‘wind flap’ is present. The product specifications represent the results sourced from third party testing authorities, and tolerances may vary by as much as +/- 10%. The Manufacturer reserves the right to alter or modify product specifications and colors without notice, and assumes no obligation or liability for the suitability and use of its products other than those applications intended by the Manufacturer.
